

Innovative Wound Care

Unique Advantages

PolyMem and SportsWrap are innovative, adaptable, drug-free wound dressings that have been shown to reduce swelling, bruising, and pain associated with both open and closed wounds. These unique dressings also help localize the inflammatory reaction to the actual zone of injury, reducing the spread of inflammation and swelling into the surrounding tissues.

About The Company

Founded in 1977 and based in Fort Worth, Texas, Ferris Mfg. Corp. is a privately owned producer and distributor of PolyMem® wound dressings.
